

39. (Amended) The apparatus of claim 38 wherein the limb is an arm, and the correct orientation is such that the arm is substantially adjacent and proximate to the chest/upper portion of the ~~body.25~~ body 25.

40. The apparatus of claim 39 wherein the display mechanism is arranged such that a blood pressure measurement value and/or a pulse is substantially readable only if the arm is in the correct orientation.

C-7 --41. (New) The method of claim 16 wherein the orientation sensing unit measures inclination of a user wrist.--

208 --42. (New) The method of claim 17 wherein the graphical indication is by directional arrow.--

REMARKS

The present case includes claims 16-40. All claims were rejected based on alleged "new matter", pursuant to 35 U.S.C. § 112, first paragraph.

The rejection is respectfully traversed. No new matter has been added, and the principal concern appears to be one of proper terminology. Accordingly, all of the claims have been amended and are now a clearer recitation of applicants' inventive features.

Enclosed herewith is a petition and fee for a three month extension of time within which to respond to the instant Office Action. Please charge any insufficiency in the fee to Deposit Account No. 08-2776.

Respectfully submitted,

MORGAN, LEWIS & BOCKIUS LLP
